Dear Sir / Madam,

Information Technology Projects Are Being More Complex

But don't worry, IT Managing and Infrastructure designing is what I do best. My name is Serdar SARIOGLU and I am a Senior IT Architect & Security Expert with more than ten years' making Infrastructures Efficient and Secure! I've helped companies to complete their high and mid-level projects on time and improve their IT Operations!

After fully technical years I am now able to understand IT requirements, make budgets, project plans and report.

Now I am responsible for Exact Netherlands (The Biggest Accounting and ERP Company in Europe) Cloud Infrastructure and managing Amazon AWS - Azure Systems (35,000+ Clients), making them efficient and secure.

My Profession History

Network Administration ⇒ System Engineering ⇒ Industrial IT (OT) ⇒ ERP Production & Planning ⇒ IT Security ⇒ Cloud Computing (DevOps)

My IT orientation started in university (ECE) with CCNA and MCSE certification programs in 2000's. Then I started working at Ford Motor Company as Network Administrator and managed Turkey's biggest Dealer network. This network covers 5,000+ of clients and affects customers directly. I have integrated GPRS lines for 200 sites and decreased down time.

I have continued working as System Administrator at Mira and I have centralized Active Directory, Exchange topology and internal customers were able to log on all sites. I also have solved chronic production problems with bash scripts and prohibit financial losses.

I have started working at TUPRAS (the biggest Enterprise of Turkey with 29 million tons/year capacity of crude oil processing) as System Administrator in time I promoted as supervisor and at least as IT Coordinator. I have deployed First Container (Mobile) Data Centre in Turkey and improved Business Continuity. I managed KOC Holding ICS Security Commission and Generated Standard for Industrial Security.

The Road Map

I am improving myself with new technologies and completed IT Certifications (ACSA, CISSP, CEH, CCNA, VCE - for more details, please refer to the enclosed resume). I believe that my skills will help your companies IT level increase and mentor the team.

How Can I Take My Relationship to the Next Level?

I'd love the opportunity to interview with you how my qualifications meet your needs. Kindly reach me at +90 549-562-3012 or e-mail me at serdar.sarioglu@icloud.com. Thank you for your time and consideration and I hope to hear from you soon.

Sincerely,

Serdar
